

## Reg. Section 1.121-1(e)(4), Example 5

Exclusion of gain from sale or exchange of a principal residence.

...

(e) Property used in part as a principal residence –

- (1) Allocation required. Section 121 will not apply to the gain allocable to any portion (separate from the dwelling unit) of property sold or exchanged with respect to which a taxpayer does not satisfy the use requirement. Thus, if a portion of the property was used for residential purposes and a portion of the property (separate from the dwelling unit) was used for non-residential purposes, only the gain allocable to the residential portion is excludable under section 121. No allocation is required if both the residential and non-residential portions of the property are within the same dwelling unit. However, section 121 does not apply to the gain allocable to the residential portion of the property to the extent provided by paragraph (d) of this section.
- (2) Dwelling unit. For purposes of this paragraph (e), the term dwelling unit has the same meaning as in section 280A(f)(1), but does not include appurtenant structures or other property.
- (3) Method of allocation. For purposes of determining the amount of gain allocable to the residential and non-residential portions of the property, the taxpayer must allocate the basis and the amount realized between the residential and the non-residential portions of the property using the same method of allocation that the taxpayer used to determine depreciation adjustments (as defined in section 1250(b)(3)), if applicable.
- (4) Examples. The provisions of this paragraph (e) are illustrated by the following examples:

Example 1. Non-residential use of property not within the dwelling unit.

- (i) Taxpayer A owns a property that consists of a house, a stable and 35 acres. A uses the stable and 28 acres for non-residential purposes for more than 3 years during the 5-year period preceding the sale. A uses the entire house and the remaining 7 acres as his principal residence for at least 2 years during the 5-year period preceding the sale. For periods after May 6, 1997, A claims depreciation deductions of \$9,000 for the non-residential use of the stable. A sells the entire property in 2004, realizing a gain of \$24,000. A has no other section 1231 or capital gains or losses for 2004.
- (ii) Because the stable and the 28 acres used in the business are separate from the dwelling unit, the allocation rules under this paragraph (e) apply and A must allocate the basis and amount realized between the portion of the

property that he used as his principal residence and the portion of the property that he used for non-residential purposes. A determines that \$14,000 of the gain is allocable to the non-residential-use portion of the property and that \$10,000 of the gain is allocable to the portion of the property used as his residence. A must recognize the \$14,000 of gain allocable to the non-residential-use portion of the property (\$9,000 of which is unrecaptured section 1250 gain within the meaning of section 1(h), and \$5,000 of which is adjusted net capital gain). A may exclude \$10,000 of the gain from the sale of the property.

Example 2. Non-residential use of property not within the dwelling unit and rental of the entire property.

- (i) In 1998 Taxpayer B buys a property that includes a house, a barn, and 2 acres. B uses the house and 2 acres as her principal residence and the barn for an antiques business. In 2002, B moves out of the house and rents it to tenants. B sells the property in 2004, realizing a gain of \$21,000. Between 1998 and 2004 B claims depreciation deductions of \$4,800 attributable to the antiques business. Between 2002 and 2004 B claims depreciation deductions of \$3,000 attributable to the house. B has no other section 1231 or capital gains or losses for 2004.
- (ii) Because the portion of the property used in the antiques business is separate from the dwelling unit, the allocation rules under this paragraph (e) apply. B must allocate basis and amount realized between the portion of the property that she used as her principal residence and the portion of the property that she used for non-residential purposes. B determines that \$4,000 of the gain is allocable to the non-residential portion of the property and that \$17,000 of the gain is allocable to the portion of the property that she used as her principal residence.
- (iii) B must recognize the \$4,000 of gain allocable to the non-residential portion of the property (all of which is unrecaptured section 1250 gain within the meaning of section 1(h)). In addition, the section 121 exclusion does not apply to the gain allocable to the residential portion of the property to the extent of the depreciation adjustments attributable to the residential portion of the property for periods after May 6, 1997 (\$3,000). Therefore, B may exclude \$14,000 of the gain from the sale of the property.

Example 3. Non-residential use of a separate dwelling unit.

- (i) In 2002 Taxpayer C buys a 3-story townhouse and converts the basement level, which has a separate entrance, into a separate apartment by installing a kitchen and bathroom and removing the interior stairway that leads from the basement to the upper floors. After the conversion, the property constitutes 2 dwelling units within the meaning of paragraph (e)(2) of this section. C uses the first and second floors of the townhouse as his principal residence and rents the basement level to tenants from

2003 to 2007. C claims depreciation deductions of \$2,000 for that period with respect to the basement apartment. C sells the entire property in 2007, realizing gain of \$18,000. C has no other section 1231 or capital gains or losses for 2007.

- (ii) Because the basement apartment and the upper floors of the townhouse are separate dwelling units, C must allocate the gain between the portion of the property that he used as his principal residence and the portion of the property that he used for non-residential purposes under paragraph (e) of this section. After allocating the basis and the amount realized between the residential and non-residential portions of the property, C determines that \$6,000 of the gain is allocable to the non-residential portion of the property and that \$12,000 of the gain is allocable to the portion of the property used as his residence. C must recognize the \$6,000 of gain allocable to the non-residential portion of the property (\$2,000 of which is unrecaptured section 1250 gain within the meaning of section 1(h), and \$4,000 of which is adjusted net capital gain). C may exclude \$12,000 of the gain from the sale of the property.

Example 4. Separate dwelling unit converted to residential use. The facts are the same as in Example 3 except that in 2007 C incorporates the basement of the townhouse into his principal residence by eliminating the kitchen and building a new interior stairway to the upper floors. C uses all 3 floors of the townhouse as his principal residence for 2 full years and sells the townhouse in 2010, realizing a gain of \$20,000. Under section 121(d)(6) and paragraph (d) of this section, C must recognize \$2,000 of the gain as unrecaptured section 1250 gain within the meaning of section 1(h). Because C used the entire 3 floors of the townhouse as his principal residence for 2 of the 5 years preceding the sale of the property, C may exclude the remaining \$18,000 of the gain from the sale of the house.

Example 5. Non-residential use within the dwelling unit, property depreciated. Taxpayer D, an attorney, buys a house in 2003. The house constitutes a single dwelling unit but D uses a portion of the house as a law office. D claims depreciation deductions of \$2,000 during the period that she owns the house. D sells the house in 2006, realizing a gain of \$13,000. D has no other section 1231 or capital gains or losses for 2006. Under section 121(d)(6) and paragraph (d) of this section, D must recognize \$2,000 of the gain as unrecaptured section 1250 gain within the meaning of section 1(h). D may exclude the remaining \$11,000 of the gain from the sale of her house because, under paragraph (e)(1) of this section, she is not required to allocate gain to the business use within the dwelling unit.

Example 6. Non-residential use within the dwelling unit, property not depreciated. The facts are the same as in Example 5, except that D is not entitled to claim any depreciation deductions with respect to her business use of the house. D may exclude \$13,000 of the gain from the sale of her house because, under paragraph (e)(1) of this section, she is not required to allocate gain to the business use within the dwelling unit.
